CO

Clinic OS

دليل الميزات التفصيلي — كل أيقونة وفلتر وشاشة (ديسكتوب + موبايل)

White-label physical-therapy clinic platform. This document annotates **every major control**: app-bar icons, themes, languages, notifications, appointment list vs schedule, income/expense filters, and finance-summary cells — with **full-page real screenshots**.

Web · Android · iOS | Desktop + Mobile shots | AR ↔ EN · Dark ↔ Light | Icon-level detail

Contents

1. Global app bar icons
2. Appointments — every filter & view
3. Income & Expenses — every control
4. Finance summary — every column/cell
5. Other screens gallery
6. Mobile views
7. Platforms & roles
8. ملخص عربي

1. Global app bar — every icon

شريط التطبيق العلوي — شرح كل أيقونة

> These icons appear on almost every authenticated screen (Appointments, Income, Reports, Chat, …). Same behavior on Web, Android, and iOS.

💬 **Messages / Chat**
Opens clinic messaging (1:1, groups, broadcast). Badge may show unread.

🔔 **Notifications**
Opens in-app panel: upcoming appointments, audit items (admin), open todos. Desktop = dialog; phone = bottom sheet.

↻ **Refresh (Web)**
Reloads the page to fetch the latest web build / data. Tooltip: "Refresh (get latest update)".

🌐 **Language**
Toggles Arabic ↔ English. Full UI RTL when Arabic. Tooltip shows the language you will switch to.

🌙 / ☀️ **Theme**
Toggles Dark ↔ Light. Moon icon in dark mode; sun icon in light mode. Preference is persisted.

← **Back**
Returns to previous route / dashboard.

\+ **Context add**
Screen-specific create action (new appointment, income, expense, user, room…).

≡ **Drawer / menu**
Dashboard hamburger opens navigation filtered by the user's roles & privileges.

Language & theme in practice

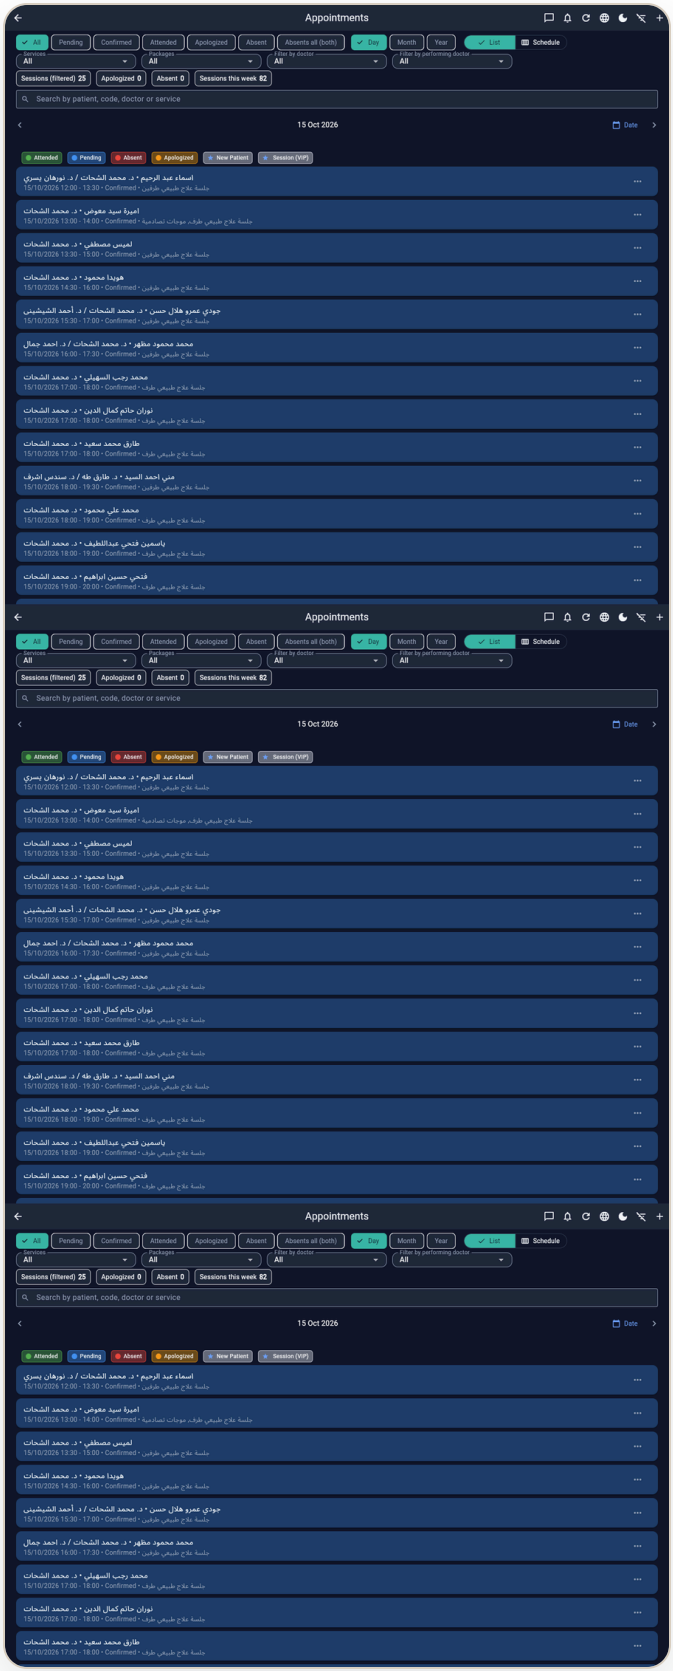

Language switch rebuilds all labels (status chips, filters, finance headers). Theme switch repaints surfaces, cards, and charts for day/night clinic floors.

Appointments after theme/language controls — same screen, different chrome

2. Appointments — every button, filter, legend & cell

شاشة المواعيد — كل زر وفلتر وخلية

Desktop · Appointments full tall capture (list view)

2.1 App-bar actions (this screen)

Back
Leave appointments.

Global icons
Messages, Notifications, Refresh, Language, Theme — see §1.

Show / Hide filters
Icon `filter_list` / `filter_list_off`. Collapses status chips, date chips, dropdowns, and count row to give the list more space.

Create appointment
Opens the full booking dialog: patient, supervising doctor, performing doctor, room, date/time, services, package, cost, discount %, notes, VIP star, extra slot.

2.2 Status filter chips

Chip	What it shows
All	Resets status + (when used as “today reset”) clears doctor/service/package filters and jumps to today.
Pending	Not yet confirmed.
Confirmed	Booked and confirmed.
Attended	Completed / patient attended.
Apologized	Absent with cause (اعتذار).
Absent	Absent without cause / no-show style absence.
Absents all (both)	Both apologized + absent types together.

2.3 Period chips & List / Schedule toggle

Day filter
Single calendar day (with prev/next day & date picker).

Month filter
Whole month of appointments.

Year **Year filter**
Whole year.

List **List view**
Vertical cards: patient ▪ supervisor / performer, time, status, service, notes, ⋮ menu.

Schedule **Schedule view**
Day grid: time rows (every 30 min 00:00–23:30) × room columns. Shows conflicts visually; cancelled/absent don't keep the room.

> **List vs Schedule:** List is best for search & status ops. Schedule is the floor board — who is in which room at which half-hour. Toggle lives in the filter row as a segmented control with list / calendar icons.

2.4 Dropdown filters

Dropdown	Behavior
Services	Keep appointments that include that service name.
Packages	Filter by linked package id.
Filter by doctor	Supervising / billing doctor (`doctorId`).
Filter by performing doctor	Who ran the session (`performingDoctorId`) — doctors + trainees.

2.5 Live count chips

- **Sessions (filtered)** — count after all filters.
- **Apologized** / **Absent** — subset counters.
- **Sessions this week** — week total for planning.

2.6 Search & date navigator

🔍 **Search**
Matches patient name, patient code, supervising doctor, performing doctor, or service text. Clear (×) resets.

‹ › **Previous / Next day**
Step the Day filter one day.

Date picker

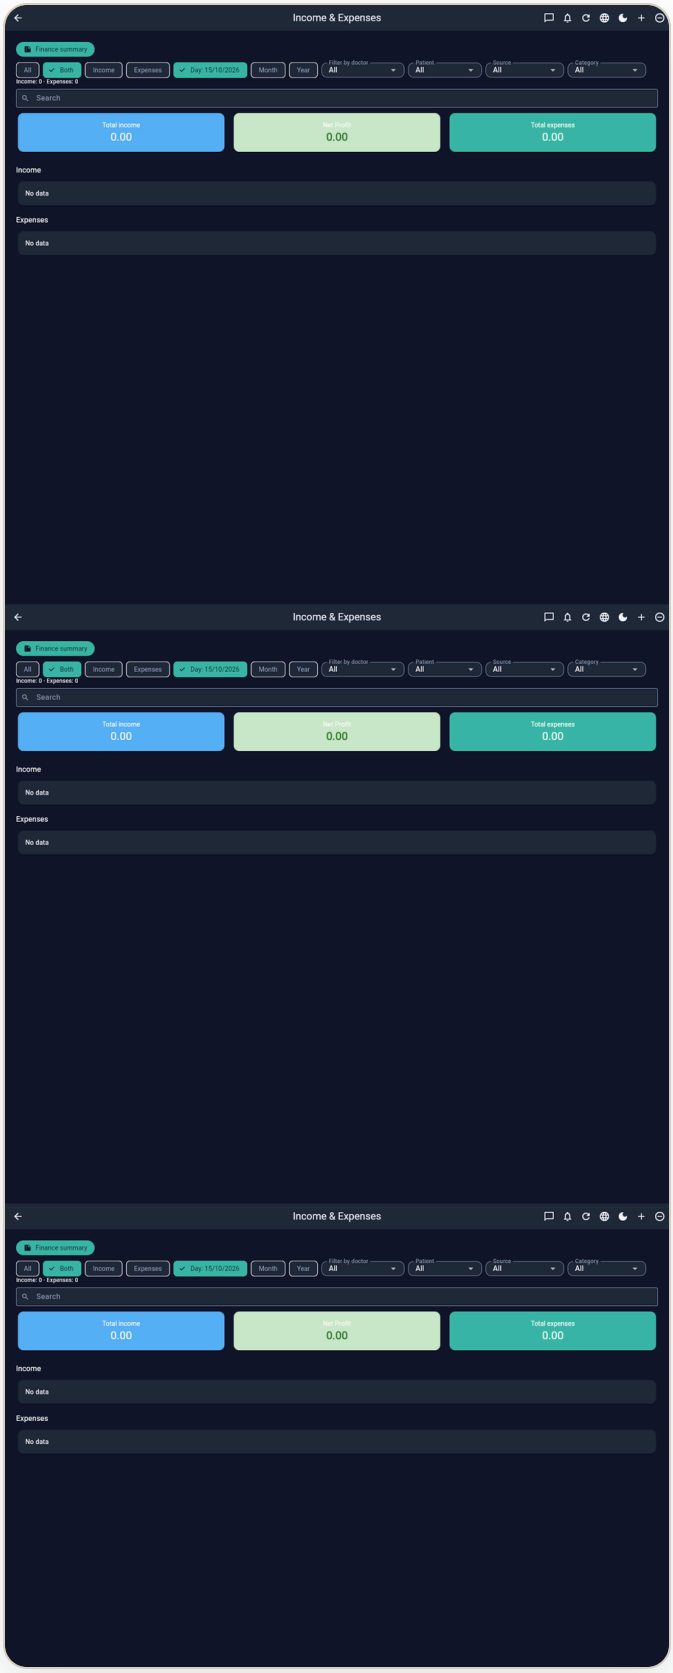

Jump to any calendar day.

2.7 Legend & list card anatomy

Legend / cell	Meaning
Green · Attended	Completed session color.
Blue · Pending	Awaiting confirmation.
Red · Absent	No-show / absent without cause.
Orange · Apologized	Absent with cause.
⭐ New patient	Star marker for new patient priority.
⭐ Session (VIP)	Starred / VIP session (`isStarred`).
Title line	`Patient • Supervisor` or `Patient • Supervisor / Performer`.
Subtitle line	Date, start–end, status label, services; optional Notes line.
⋮ Show menu	Edit / status transitions (confirm, complete, cancel, absent…) by privilege.

3. Income & Expenses — every control

الدخل والمصروفات — شرح كل عنصر

Desktop · Income & Expenses full tall capture

3.1 App-bar icons

Back
Return.

Global
Messages, Notifications, Refresh, Language, Theme.

Add income
Opens Add Income: amount, source, notes, date/time, optional doctor/patient/appointment links.

Add expense
Opens Add Expense: amount, category (Salary/Rent/Supplies/Media/Other), paid-by-doctor, optional employee/recipient, description.

3.2 Finance summary shortcut

Teal button **Finance summary** (summarize icon) navigates to the owner P&L screen (§4).

3.3 Type chips

Chip	Effect
All / Both	Show income and expense sections together.
Income	Focus income stream.
Expenses	Focus expense stream.

3.4 Period chips

- **Day** — pick a calendar day (label shows the selected date).
- **Month** — month/year picker.
- **Year** — year picker.

3.5 Dropdown filters

Filter	What it does
Filter by doctor	Income/expense rows tied to that doctor.
Patient	Rows linked to a patient.
Source	Income source values.
Category	Expense categories (Salary, Rent, Supplies, Media, Other).

3.6 Summary cards & lists

Total Income card

Sum of filtered income (EGP).

Net Profit card

Income – expenses for the filter.

Total Expenses card

Sum of filtered expenses.

Income by doctor / Expense by doctor

Breakdown blocks under the cards when data exists.

Row menu

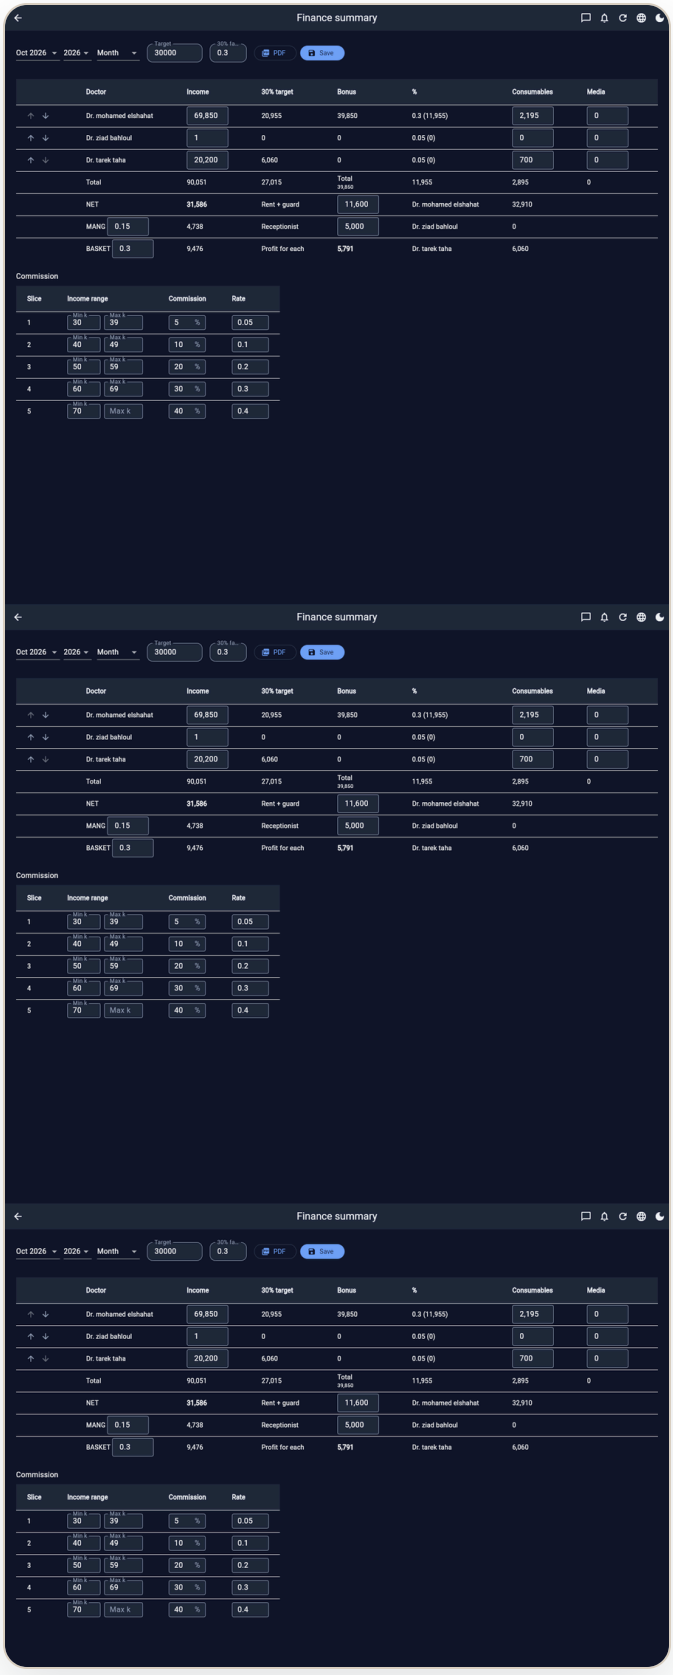

Edit or Delete a record.

Each **income row** shows: amount, source, date/time, notes, patient, doctor, payment status (Paid / Partial / Prepaid / Not paid).
Each **expense row** shows: amount, date/time, category, description, paid-by-doctor, optional recipient (salary).

> Search box filters free text across visible fields. Counter text under filters: *Income: N · Expenses: M*.

4. Finance summary — every field & cell

الملخص المالي — كل عمود وخلية

Desktop · Finance summary full tall capture

4.1 Header controls

Period selectors
Choose month & year for the sheet.

Range mode
Aggregates months; config scales for multi-month ranges.

Clinic target
Editable money target for the period.

Percent factor
Usually 0.3 — drives "30% Target" column = income × factor.

Export PDF
Bilingual PDF with Amiri + Arabic reshaper.

Save config
Persists target, rates, slices, doctor order for the month.

4.2 Doctor performance table (columns)

Column / control	Meaning
↑ ↓ arrows	Reorder doctors (saved order).
Doctor	Doctor display name.
Income	Sum of that doctor's income in range.
30% Target	Income × 30% factor (c30).
Bonus	Bonus amount derived from target logic.
%	Commission % from slices + computed value.
Consumables	Mapped expense bucket for that doctor.
Media	Media expense bucket.
Total row	Sums across doctors.

4.3 NET / MANG / BASKET block

Cell	Meaning
NET	Net after doctor-level deductions — basis for splits.
Rent + guard	Editable shared clinic overhead (from Rent expenses / config).

Receptionist	Editable shared salary line (from Salary expenses / config).
MANG (rate)	Management share of NET (e.g. 0.15 = 15%). Editable rate.
BASKET (rate)	Basket/pool share of NET (e.g. 0.30). Editable rate.
Profit for each	Remaining profit figure after MANG/BASKET logic.
Per-doctor Net side column	Individual net after commission/consumables.

4.4 Commission slices table

Column	Meaning
Slice	Tier index.
Income range	Min–max income band for the tier.
Commission	Percent for that band (editable).
Rate	Decimal form of commission (kept in sync).

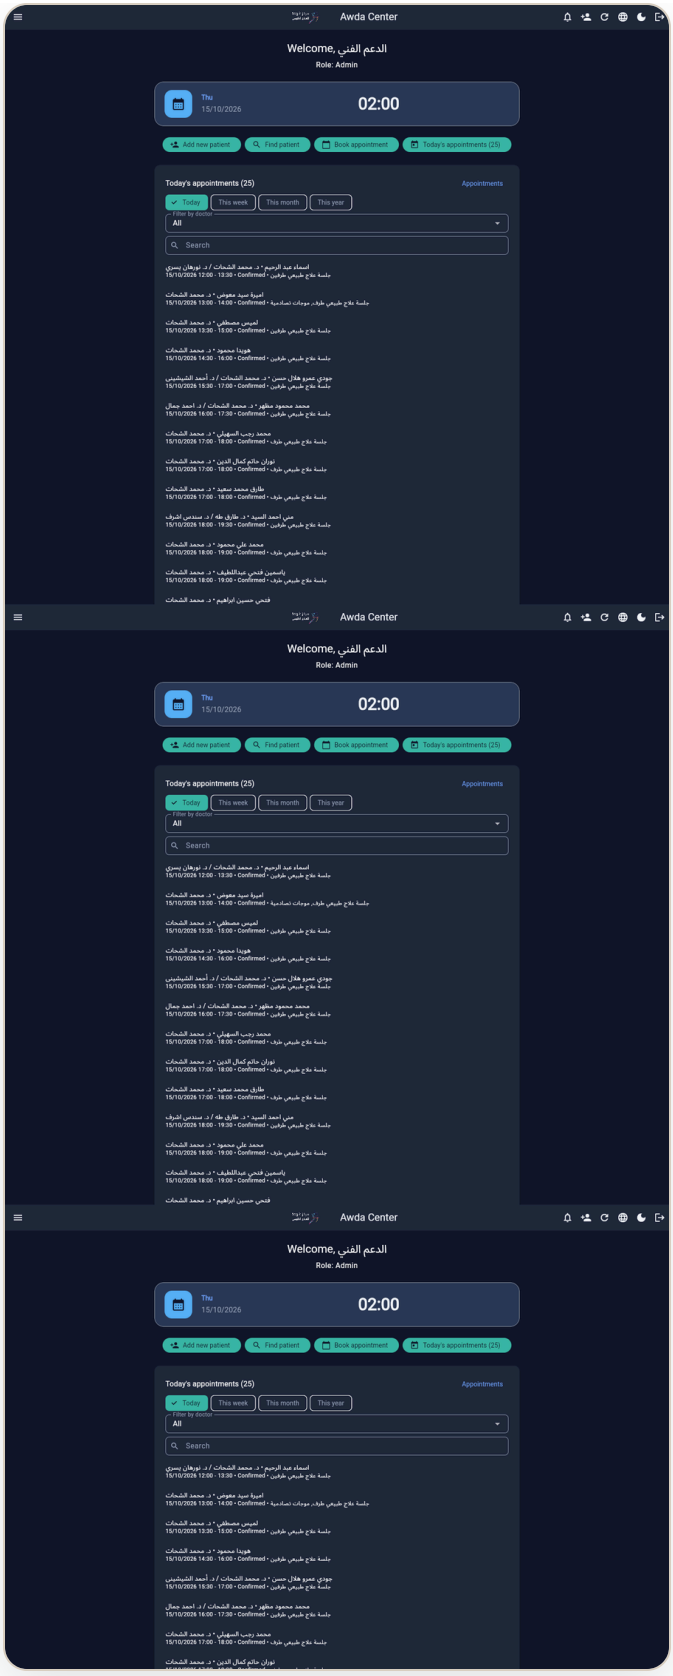

> This screen is the commercial heart for partner clinics: transparent doctor income, targets, overhead, and MANG/BASKET splits — exportable as PDF for monthly meetings.

5. Other screens (full-page desktop)

شاشات أخرى — التقاط كامل

Dashboard

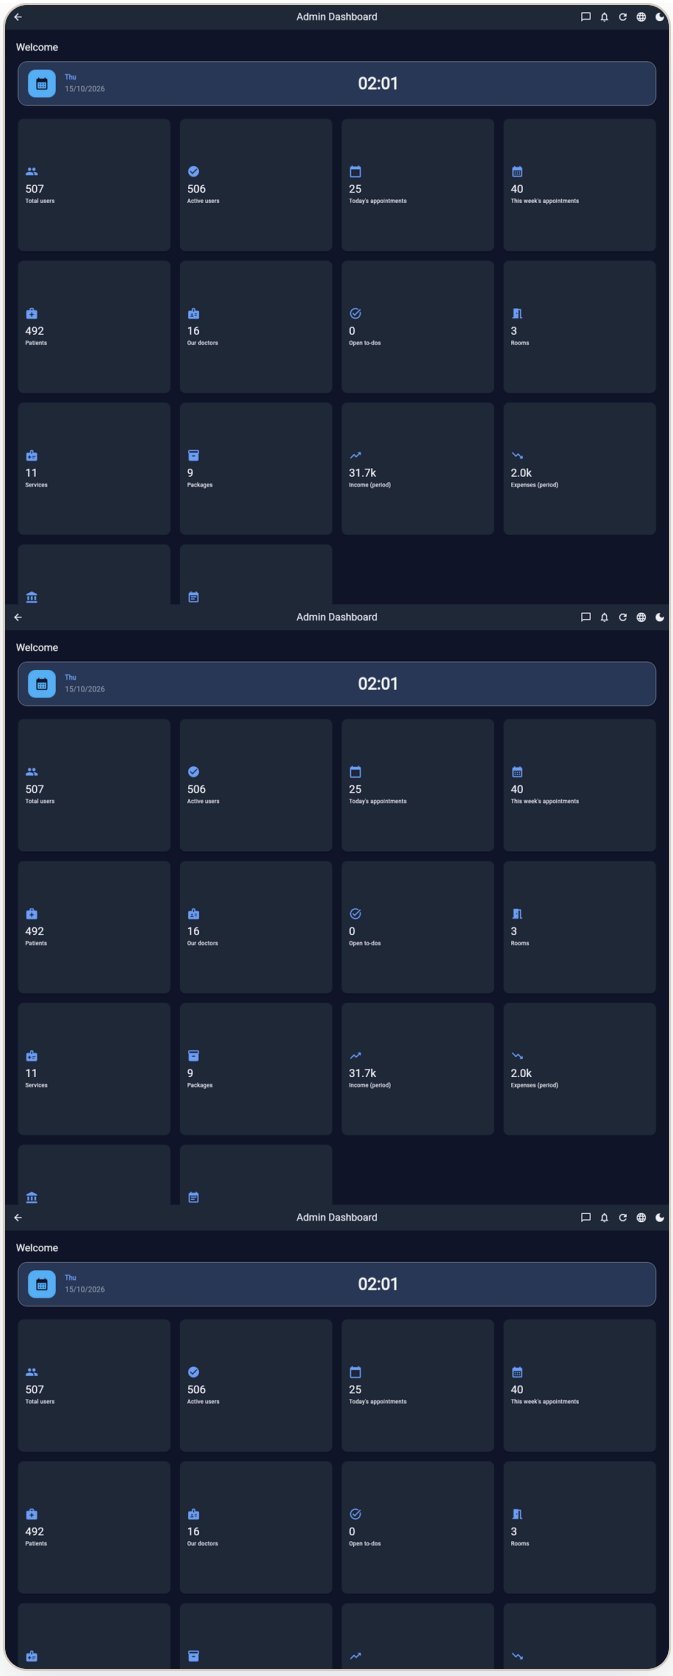

Welcome + role, date/time card, quick actions (Add patient, Find patient, Book appointment, Today’s count), period chips, doctor filter, search, appointment rows with supervisor/performer.

Desktop · Dashboard full page

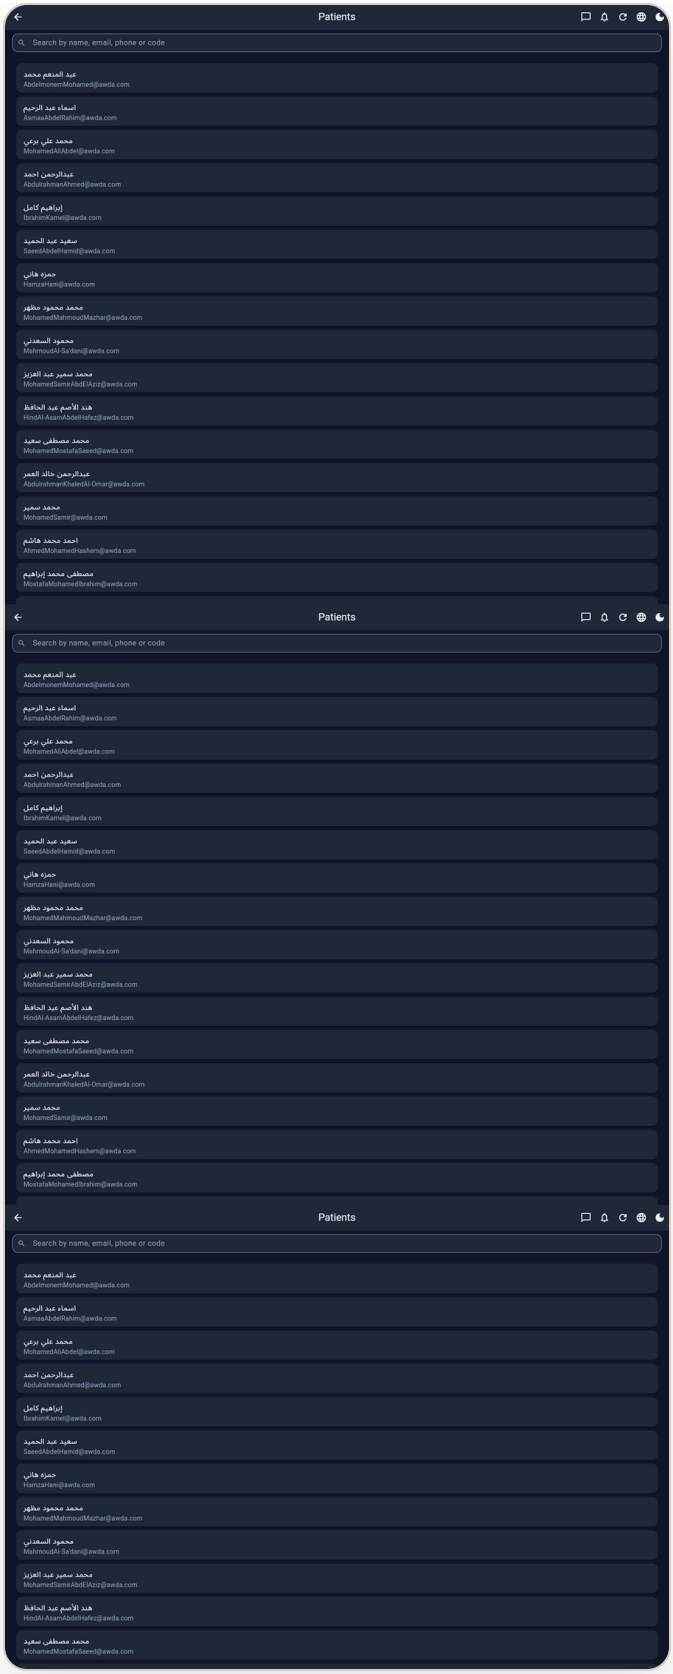

Admin Dashboard KPIs

Total users, active users, today's / week's appointments, patients, doctors — plus deeper charts (income, workload, expenses) further down the scrollable page.

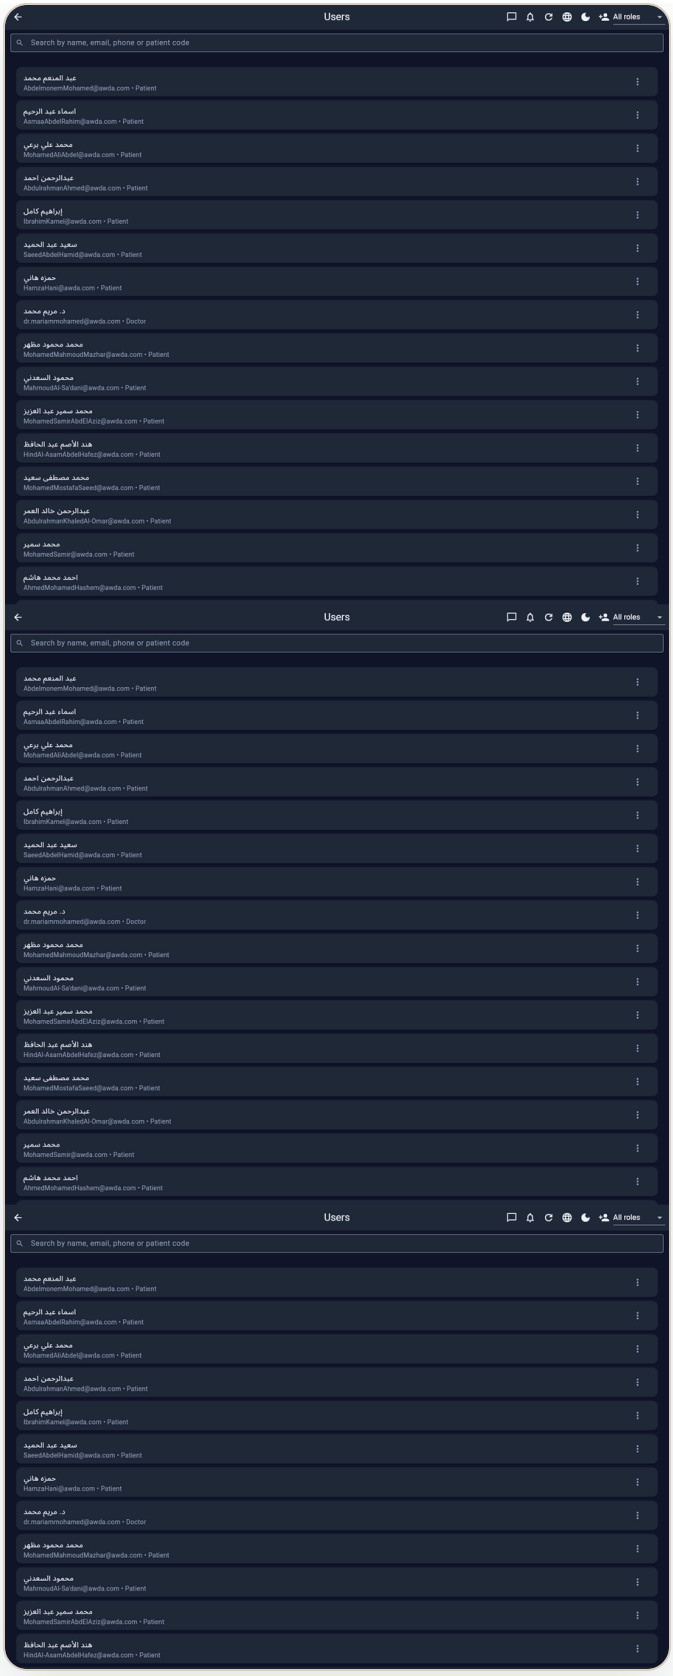

Desktop · Admin dashboard
